Work Experience

Software Engineer
@ Refresh Bubbles, Porto

November 24
Present

Developed numerous solutions to improve diversified customers' workflows, including designing architecture and implementing both frontend and backend components. Delivered industrial dashboards, pharmacy and logistics software, and REST APIs.

Fullstack Developer
@ TAW Software, Rio Tinto

February 21
August 21

Contributed to a SaaS platform by designing and implementing both frontend (jQuery, Bootstrap, Leaflet.js) and backend (Node.js, Express, PostgreSQL) solutions. Developed RESTful APIs, built interactive geospatial maps, and integrated system monitoring with Zabbix.

Education

Management and Programming of Computer Systems
@ Escola Secundária Diogo de Macedo, V.N. Gaia

This course emphasizes full-stack software development, providing skills in database design, back-end development, and front-end programming. It covers the complete software development lifecycle, from creating and maintaining databases to implementing secure back-end systems and developing intuitive front-end interfaces.

Languages, Literatures & Cultures
@ University of Porto, Porto

Languages

Portuguese (native)
English (fluent)

Skills

Front-end development
- React
- Next.js
- Vue
- Nuxt.js
- Svelte
- jQuery

Back-end development
- Node.js
- Python
- Rust
- RESTful APIs
- PHP
- Java
- SQL & NoSQL

DevOps
- Version Control (git)
- CI/CD
- Containerization
- Cloud Platforms
- Orchestration
